General Summary

I am a self-motivated, diligent, and detail oriented web developer with a passion for crafting high-quality web applications. As a trans girl with autism and ADHD, I have a deep passion for learning and development, always striving to expand my knowledge and refine my skills. With over 3 years of experience in full-stack development, I specialize in frontend and backend technologies, focusing on efficiency, performance, and security. I have strong leadership skills from managing teams and projects, and I thrive in collaborative environments where problem solving and innovation are key. My expertise includes JavaScript, TypeScript, React, Next.js, and Node.js, along with backend management using Supabase, MongoDB, and Express.js. Additionally, I have experience in system administration, which enhances my ability to optimize and secure web applications. I am also known for being very friendly and approachable, making teamwork and communication seamless in any project setting.

Technical Skills

- **Frontend Development:** React.js, Next.js, HTML, CSS, TailwindCSS, TypeScript
- **Backend Development:** Node.js, Express.js, Supabase, PostgreSQL, MongoDB
- **Security & Optimization:** Web security best practices, authentication (OAuth, JWT), API development
- **DevOps & Deployment:** Docker, CI/CD, Nginx, Netmaker, Linux server management
- **Version Control & Collaboration:** Git, GitHub, Gitlab

Professional Experience

Updated as Of March 17th, 2025

Darkless LTD (2024-Present)

Director & Lead Dev Ops

- Co-directed a hosting company providing bare-metal and VPS solutions
- Developed and managed scalable web applications for client services
- Worked on backend optimization and server-side security enhancements
- Assisted in infrastructure automation and DevOps tasks
- Assisted in making a clean website for the Hosting

[Website](#) | [Github](#)

LunarLabs LLC (2024-Present)

Founder & COO

- Founded the Company as a Software Dev Studio focusing on making Video Games
- Developed and managed scalable web related applications
- Worked on backend optimization and server-side security enhancements
- Assisted in infrastructure automation and DevOps tasks
- Provided a Website with a Customer Dashboard and Admin Panel as well.

Scala Studios LLC (2023-Present)

Vice President and Co Director

- Built and maintained web applications for Minecraft server management
- Developed user-friendly dashboards with React.js and TailwindCSS
- Integrated backend APIs for authentication and server analytics
- Contributed to an internal licensing system for plugin security
- Provided a website with a friendly design ensuring it is also responsive

[Website](#) | [Github](#)

DarkInfra (2025-Present)

Director & Lead Sys Ops

- Managed and maintained server infrastructure for high-availability Minecraft and game server environments
- Administered network configurations, including VPN, firewalls, and load balancers for secure and efficient operations
- Automated system monitoring, backups, and scaling solutions using tools like Ansible, Terraform, and custom scripts
- Implemented performance tuning and optimization for databases, file systems, and server resources
- Ensured system security with regular patching, vulnerability assessments, and monitoring for intrusion detection
- Provided support and troubleshooting for critical infrastructure issues to ensure 24/7 uptime
- Provided a website with a clean and responsive UI/UX design

GetVCS (2024-2024)

CSO & Web Developer

- Hired to develop a website and client dashboard, enhancing user experience and providing essential tools for clients

- Acted as CSO, overseeing the strategic direction of the company and aligning technical solutions with business objectives
- Designed and built responsive, user-friendly web applications with a focus on clean UI/UX for seamless client experiences
- Utilized modern frameworks like React.js, Next.js, and TailwindCSS to create scalable, performant applications
- Integrated backend services and APIs for managing complex data, supporting user authentication, and ensuring smooth system integrations
- Delivered full-stack solutions

PinkCloud Studios (2023-2024)

CEO & Founder

- Specialized in freelancing development and infrastructure management for clients across various industries
- Designed and built custom web applications, focusing on responsive, user-friendly websites with clean UI/UX for seamless experiences
- Utilized modern frameworks like React.js, Next.js, and TailwindCSS to create scalable and performant applications
- Integrated backend services and APIs for complex data management, user authentication, and system integrations
- Delivered full-stack solutions, including front-end design, back-end architecture, and automated deployment pipelines
- Collaborated with clients to provide tailored solutions while offering ongoing support and guidance
- Contributed to open-source software, providing tools and resources for others to learn and develop with our frameworks

Open Source Projects

Hynax

[Repository Link](#)
A open source Discord bot built using OceanicJS and is the successor to my old bot [Hynaxv1](#). It offers a wide range of features including announcements, verification, information panels, polls, moderation, automoderation, message purging, reaction roles, reporting, and a ticket system.

LunarShell

[Repository Link](#) **|** [Website](#) | [Website Code](#)

A sleek, secure, and intuitive shell environment designed to elevate your Linux server experience. With smart configurations, enhanced security features, and stylish customizations, it's tailored for server distributions and optimized for seamless system administration.

Personal Attributes

- **Passionate Learner:** Always seeking new knowledge and improving in skills
- **Problem Solving:** Able to identify and resolve technical challenges efficiently
- **Friendly & Approachable:** Enjoys working with others and fostering a positive team environment

- **Communication Skills:** Experienced in team collaboration and client interaction
- **Willingness to Learn:** Continuously expanding knowledge
- **Adaptability:** Quick to adapt to new frameworks and changing requirements
- **Security Oriented Mindset:** Prioritizes secure coding practices and server hardening

Testimonials // Vouches // References

- Elaina [Discord: @ewaina Discord ID: 227477384356429824]

"I've watched Luna go from just starting out as a dev. to being genuinely great at what they do. They're super dedicated and focused into getting better, whether it's sysadmin, legal stuff, or web dev. It's been really cool seeing her progress, and she is just solid to work with reliable, sharp, and always willing to figure things out. Definitely someone I respect a lot! As a co-worker, they've also been very understanding and attentive of me, whenever I had personal problems or health issues that got in the way. Not only that, but they've always had their ears open for feedback, generally improving after."

- Amaan [Discord: @drizzyfarooqi Discord ID: 730736805019648060]

"I've had the pleasure of working alongside Luna on several projects, and her blend of technical skill and creative insight is truly remarkable. Not only is she an expert in cybersecurity, system administration, and server management, but her passion for web development and UI/UX design also shines through. I was especially impressed by the beautiful, user-friendly website she designed for our team at Refine—it really stands out. Luna's genuine personality and collaborative spirit make her easy to work with"

- Subham [Discord: @growlygg Discord ID: 559497100296060939]

"Vouch for Emily- has done a great job in assisting me when it comes to maintaining backend services at Scala & our operated networks. (PvPBar, Verio)"

- Max [Discord: @98ping Discord ID: 421443176838987786]

"Emily is one of the best system admins that I ever came into contact with. I have personally owned and staffed on projects that used her as a system admin and not once was there any issues with the service and the system was entirely secure. Emily has mastered the system administration space and is very good at what she does. Definitely recommend."

- Michael [Discord: @tdvne Discord ID: 1014884454847746058]

"I am the Owner & Founder of the Esta Network, and my server has went through many ups and downs, and whilst during one of the downs, Emily went out of her way to help us get back on our feet, I am more than thankful and grateful that she did this for us, Emily is a knowledgeable person and an incredible system administrator, as well as always reliable in every situation that we've encountered. I would highly recommend Emily to anybody who is in need of a system administrator, website developer, and or discord bot developer."

- Jay [Discord: @j.ersey Discord ID: 953849600626794506]

"Luna was a great sysadmin @ Duels, very responsive, helped us with numerous encounters from malicious attempts to casual maintenance. I recommend their services!"

- Nathan [Discord: @nopox Discord ID: 679986828912492554]

"Vouch for Emily - She worked on the system administration and frontend for a large scale distributed CI/CD system. She has also managed 8+ machines for me over the years I have known her. She is easy to work with and takes initiate herself to keep our system secure and running efficiently."
